

Illinois Program of Study Expectations Tool

The Carl D. Perkins Career and Technical Education Improvement Act of 2006 (Perkins IV) calls for states to create secondary-to-postsecondary sequences of academic and career technical (CTE) coursework that lead students to attain a postsecondary degree, or industry-recognized certificate or credential.

Specifically, Perkins IV mandates that Programs of Study (POS), at a minimum:

- Incorporate and align secondary and postsecondary education elements;
- Include academic and CTE content in a coordinated, non-duplicative progression of courses;
- Offer the opportunity, where appropriate, for secondary students to acquire postsecondary credits; and
- Lead to an industry-recognized credential or certificate at the postsecondary level, or an associate or baccalaureate degree.

A program of study is a structured sequence of academic and career and technical education courses that lead to a postsecondary-level credential (United States Department of Education, Office of Vocational and Adult Education, 2010)

Instructions

Overview

The **Illinois Programs of Study Expectations Tool** is designed to be an interactive instrument to help educational partners ensure they are meeting both the federal Program of Study requirements AND the high standards set in Illinois. It is intended to guide a Partnership Team - or an internal self-review team - through the various Expectations and quality indicators.

The tool is organized around the **six guiding principles for implementation and evaluation of Programs of Study**. These principles are intended to assist stakeholders in the implementation and evaluation of Programs of Study. The guiding principles foster systems thinking and change at all levels of education, especially the secondary and postsecondary levels. They are based on research and promising practices that support systemic reform, educational change, and continuous improvement.

Using the Tool

Each page of the tool highlights a different guiding principle. The user is asked to consider the specific principle and associated “*design elements*” in order to make a determination of overall “Expectations.” To simplify and expedite this effort, the principle/design elements have been grouped together based on similar characteristics. The “*Evidence*” column demonstrates the possible ways the design element can be achieved. The “*Examples of Acceptable Supporting Material*” column provides examples of materials that can be used to verify implementation.

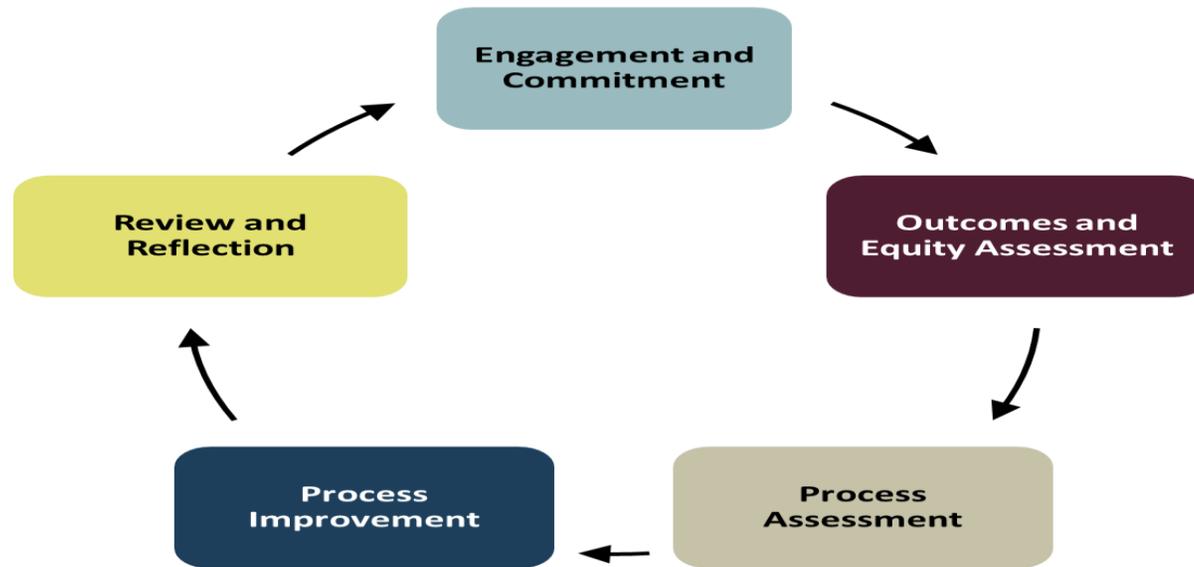

The tool includes the following items:

- POS Principle and Description
- Related Office of Vocational and Adult Education (OVAE) POS Components
- Associated Perkins IV POS Requirements (from the federal law)
- Related POS Design Elements
- Evidence
- Examples of Acceptable Supporting Material
- Status

Determining Status

Ultimately, the Partnership Team is asked to determine whether or not the POS project complies with the various compliance items **and** if the project has achieved any or all of the quality items. It requires significant knowledge of the POS being analyzed, and the Illinois POS approach in general. This is not a simple task, and it cannot be accomplished without a significant investment of time and resources to examine the entire scope of the project.

Pathways to Results(Continuous Quality Improvement) Applied to Programs of Study

Why is Continuous Quality Improvement important to the implementation of programs of study?

- The function of programs of study is to improve student access, equity, and outcomes.
- A continuous improvement model is integrated in how NASDCTE and OVAE “measure” programs of study.
- The concepts present in the CI process are previously expressed in state work on POS, including the development of POS guiding principles and design elements presented in the *Illinois Program of Study Guide* (Taylor et al. 2009).
- Programs of study are emerging as a key element in Illinois’ strategy to address critical skill shortages as well as in the State’s application for Race to the Top (see <http://www.isbe.net/racetothetop/default.htm>).
- CI can enhance school reform efforts because of its focus on academic achievement outcomes for diverse learners, and other related outcomes critical to student transition to college and careers.

How does Continuous Quality Improvement relate to this Expectations Tool? Continuous improvement is central to the development and implementation of programs of study. Perkins IV requires that each local area have *at least* one program of study to receive Perkins IV funding. The state of Illinois has embraced the idea that the development of a program of study is never finished. In other words, there is no terminal point at which the work on a POS ends. As such, this monitoring tool serves two purposes. First, it provides us with the minimum amount of information to certify that a high school / college / partnership does meet the mandates of Perkins IV. Second, it provides a baseline of information to inform the state agency staff and consultants regarding a program's progress about a program of study. It is not a substitute for the CI process but should inform that process.

Pathways to Results Applied to Programs of Study. The state has developed the Pathways to Results process for CI. Pathways to Results is a multi-step process aimed at improving student transition results in state identified career clusters and career pathways through the development of metrics, methods and tools that can be used for the creation and continuous improvement of programs of study. This process can be used for both Title I and Title II programs and has implications for improvement well beyond POS.

POS Principle 1: Leadership, Organization and Support

Programs of Study are developed, supported, and led with guidance from collaborative partners.
